

C18

Self-Checkout, Realized.

The Verifone C18 brings the self-checkout and point of sale to life with its vibrant high-definition screen for maximum customer engagement and its unique ability to function as both a cashier- and customer-facing device.

Self-service kiosks offer added convenience to any retail operations. Today's consumers want quick and simple ways to buy items so they can get back to their day. With C18, we're helping convenience store operators empower their customers to interact with them in engaging ways— increase throughput and exceed customers' expectations.

| SELF-CHECKOUT TO ASPIRE TO.

Designed to co-exist with other Verifone solutions, the C18 self-checkout easily integrates with your Commander Site Controller, POS devices and accessories. Work smarter, not harder to create operational efficiencies for your business. Access the price book from Commander Site Controller and centrally manage your site's pricing on a single platform offering a consistent experience for your entire site.

Simplified Business Management

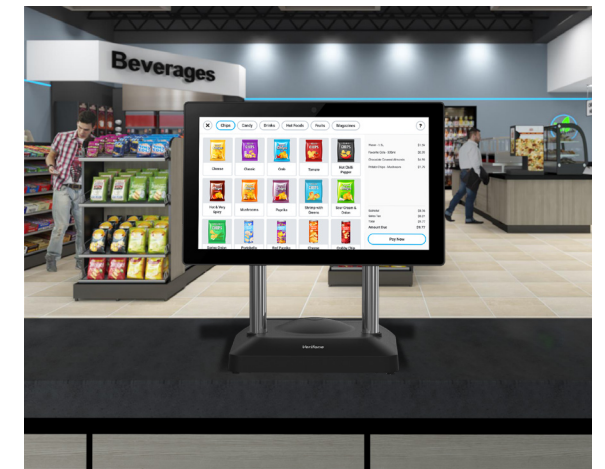

- Leverage integrations with your Commander Site Controller platform for centralized data access
- Pair with a combination of your favorite Verifone POS solutions
- Robust reporting by aggregating all of the data to your back office solution
- Cashier monitoring built into the POS

| ENGINEERED FOR EXPERIENCE.

Your POS should fit the aesthetic of your establishment. Enter C18, where style and function intersect. Our team of experts created C18 Self-Checkout to delight customers with its intuitive user interface (UI) designed with every modern consumer in mind. 47% of consumers use self-checkouts regularly* and expect retailers to offer this method of checkout to improve the checkout process. The sleek design requires minimal footprint and will make a great addition to any countertop space to complement your operations. And because C18 Self-Checkout can be deployed on the same hardware as C18 Point of Sale, retailers can maximize their investment. Only Verifone offers this unique two-in-one approach to convenience store self-checkout.

Robust Experience with Hardwearing Reliability

- 18.5" screen that offers valuable real-estate to deliver a meaningful checkout experience
- Ample room to display the rolling receipt and itemized menus for quicker item location
- Enhanced touchscreen technology with multi-touch gesture capabilities

Reasons Why Self-Checkout Will Benefit Your Business

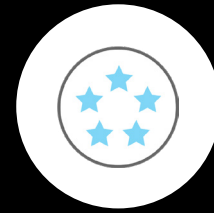

Increase In-Store Productivity

Serving customers in a quick and efficient manner is mission critical for all businesses. Alleviate the long queues and focus on getting back to what truly matters, creating a pleasant and organized store environment.

Shorter Queues

Speed at the checkout is critical for every business. Increase throughput by letting your customers grab-and-go and pay for their goods and merchandise with ease. With digital payments gaining popularity, accept familiar payment methods to satisfy your customers' expectations.

Improved Customer Satisfaction

Some customers prefer frictionless experiences with limited human interactions. With self-checkouts, customers can complete their store visit with ease.

Elevate Your Staff

Self-checkouts serve as an extension of your cashier staff – always available and never late for a shift. Allow your employees to focus on more important and valuable interactions with customers.

Maximize Counterspace

Since C18 can be deployed as a self-checkout terminal and a POS workstation, and can change based on store needs, retailers can maximize investment and counter space with this two-in-one device.

SPECIFICATIONS

Processor
